

Week 5 Day2

TestCase Review flow, with prompt template

Input given :

Test Case ID: TC_LOGIN_001

Title: Verify login

Preconditions: User exists

Steps:

1. Open app
2. Enter username and password
3. Click login

Expected Result: Login successful

Test Case ID: TC_LOGIN_002

Title: Verify login with invalid password

Preconditions: User registered

Steps:

1. Enter valid username
2. Enter wrong password
3. Click login

Expected Result: Error shown

Test Case ID: TC_LOGIN_003

Title: Verify login with empty fields

Preconditions: NA

Steps:

1. Open login page
2. Click login without entering data

Expected Result: Validation message

Test Case ID: TC_LOGIN_004

Title: Verify OTP login

Preconditions: User has mobile number linked

Steps:

1. Enter mobile number
2. Click send OTP
3. Enter OTP
4. Submit

Expected Result: Login successful

Test Case ID: TC_LOGIN_005

Title: Verify login when system is slow

Preconditions: User exists

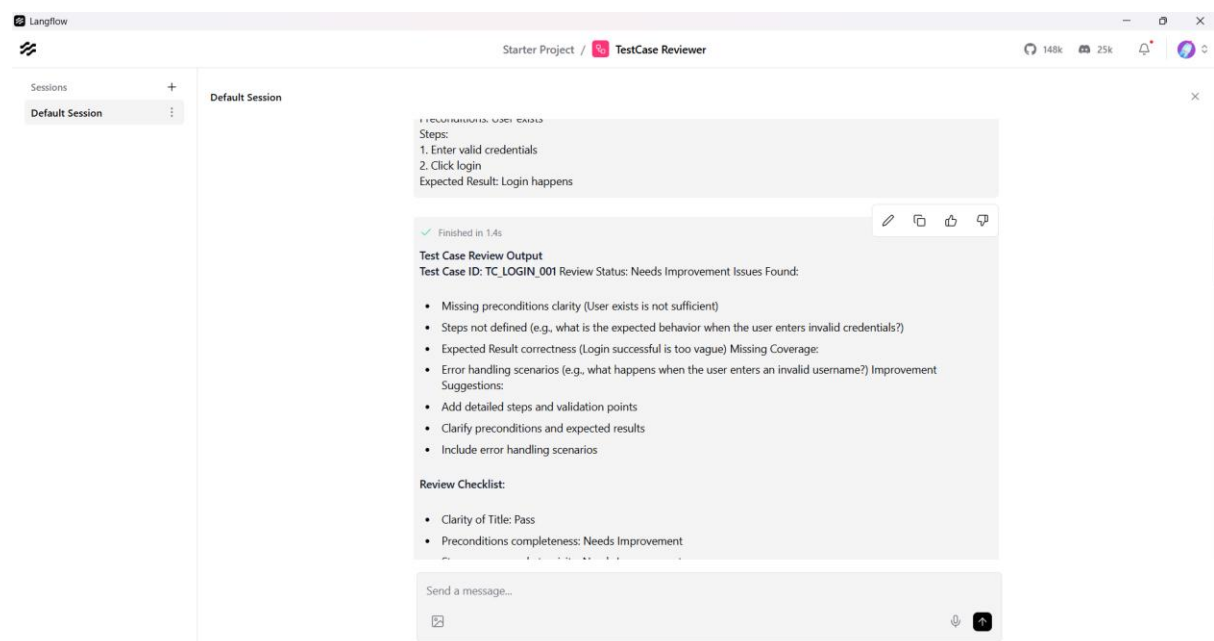

Steps:

1. Enter valid credentials

2. Click login

Expected Result: Login happens

Output generated by langflow :

****Test Case Review Output****

****Test Case ID: TC_LOGIN_001****

Review Status: Needs Improvement

Issues Found:

- Missing preconditions clarity (User exists is not sufficient)
- Steps not defined (e.g., what is the expected behavior when the user enters invalid credentials?)
- Expected Result correctness (Login successful is too vague)

Missing Coverage:

- Error handling scenarios (e.g., what happens when the user enters an invalid username?)

Improvement Suggestions:

- Add detailed steps and validation points
- Clarify preconditions and expected results
- Include error handling scenarios

****Review Checklist:****

- Clarity of Title: Pass
- Preconditions completeness: Needs Improvement
- Step accuracy and atomicity: Needs Improvement
- Expected Result correctness: Needs Improvement
- Test Data presence (if required): Pass
- Coverage (positive/negative/boundary): Needs Improvement
- Business rule validation: Pass
- Authentication/authorization coverage: Pass
- Error handling scenarios: Needs Improvement

****Test Case ID: TC_LOGIN_002****

Review Status: Pass

Issues Found:

- None

Missing Coverage:

- None

Improvement Suggestions:

- None

****Review Checklist:****

- Clarity of Title: Pass

- Preconditions completeness: Pass
- Step accuracy and atomicity: Pass
- Expected Result correctness: Pass
- Test Data presence (if required): Pass
- Coverage (positive/negative/boundary): Pass
- Business rule validation: Pass
- Authentication/authorization coverage: Pass
- Error handling scenarios: Pass

****Test Case ID: TC_LOGIN_003****

Review Status: Needs Improvement

Issues Found:

- Missing preconditions clarity (NA is not sufficient)
- Steps not defined (e.g., what is the expected behavior when the user clicks login without entering data?)
- Expected Result correctness (Validation message is too vague)

Missing Coverage:

- Error handling scenarios (e.g., what happens when the user enters invalid data?)

Improvement Suggestions:

- Add detailed steps and validation points
- Clarify preconditions and expected results
- Include error handling scenarios

****Review Checklist:****

- Error handling scenarios: Pass

****Test Case ID: TC_LOGIN_005****

Review Status: Needs Improvement

Issues Found:

- Missing preconditions clarity (User exists is not sufficient)
- Steps not defined (e.g., what is the expected behavior when the system is slow?)
- Expected Result correctness (Login happens is too vague)

Missing Coverage:

- Error handling scenarios (e.g., what happens when the system is extremely slow?)

Improvement Suggestions:

- Add detailed steps and validation points
- Clarify preconditions and expected results
- Include error handling scenarios

****Review Checklist:****
